

Individual Support

The Cascade Agenda is a century-long vision for the region from Puget Sound to the Columbia River. The result of extensive and thorough community dialogue informed by science, the Cascade Agenda lays out a set of goals for land conservation coupled with economic growth. It is also the program to achieve them. The details are laid out in the document *The Cascade Agenda, 100 Years Forward*, which can be viewed at <http://cascadeagenda.com>.

In order to make the vision real, we must all work together as a region to:

- Recognize the relationship between the creation of great communities and conservation of the region's landscapes;
- Conserve lands identified as critical to maintaining our open space, parks, and working landscapes;
- Make our cities and towns vibrant and vital, providing a magnet for people with the talents and skills that enhance our communities;
- Maintain our rural communities; and
- Endorse the concepts of market-based strategies in policies and programs.

I hereby support the Cascade Agenda. I will endeavor to exercise my leadership in a way that advances the goals it lays out. I hereby join the coalition of individuals and organizations working to implement the Cascade Agenda.
